BIZERBA

Access to the future. The latest computer technology in a compact design teamed with an 'all-purpose' printer. The X-Class represents affordable access to high-performance PC-based scales with touchscreen operation. Comfortable, intuitive and easy to work with.

More information
High performance with a wide range of solutions and options.

Product description

The Bizerba XC 400 hanging scale is specially developed for the fresh fish counter. The cleverly designed weighing tray ensures that no moisture drips onto the casing or connections even when weighing wet products. The hanging scale XC 400 combines all essential retail activities: weighing, transaction handling, printing and providing advice as well as displaying promotional messages and cross selling.

The open PC platform offers sufficient capacity to cope with new features or customer-specific requirements in the future. Even the use of 3rd-party software presents no problems. The 'all-purpose' printer is unique to the market and can perform every conceivable printing task that can be required of a weighing device. Furthermore, replacing the paper roll is a very brief and intuitive process, and daily cleaning of the scale can be carried out quickly and easily. This is supported by each scale's compact design, the Easy Clean surface of the housing and the newly developed, frameless Easy Clean display.

XC 400 operator side

Highlights

– Easy Clean for quick and easy cleaning of the scale
  – Surface: problem free removal of stray labels
  – Displays: frameless for maximum cleaning efficiency
  – Load plate: optimum ease of handling
– Easy Load enables paper rolls to be changed in a matter of seconds
  – 'All-purpose' printer with ticket, label or linerless operation up to 80 mm paper roll widths
  – Additional label layout possible on pre-printed linerless paper
– Label printer*
  – PaperNearEnd function*
    (alert when almost out of paper for unattended scales in self-service use)
– High-end PC-based scale with outstanding Intel® Dual Core processor for optimum performance and perfect graphics with minimum power consumption
– High-end Bizerba software package*
  – RetailPowerScale scale software
  – RetailApps for additional functionality
  – RetailFramework
  – RetailIntegratorsKit (RIK) for 3rd-party software
